Hello there 👋

I'm Aditya—a self-taught UI/UX designer. Over the years, I have helped companies and startups build and ship products. I've collaborated with teams—on-site and remote —and built a wide range of products across web, mobile and desktop.

Experiences

Bokaap Design

2017-2021

At Bokaap I worked as a UX/UI designer, from conceptualization to execution of UX/UI projects. I worked on the entire lifecycle of a project from research, inquiry, site flow analysis to wire-framing and design execution.

Spotlight

2019-2020

At Spotlight, I worked as a Product Designer. I helped develop a strategy, wireframe the user flows and create the final panels for developer hand-off.

Experiences

Independent Product Designer

2016-2017

Working as an Independent Designer I worked with multiple national and international clients on projects ranging from Landing pages, apps, and websites.
